

FLASH BULLETIN — EXTENDED INTELLIGENCE EDITION

Bauxite tightens, ore holds firm

Both complexes are trading in narrow, cost-defended ranges today — aluminum on tightening Guinea bauxite supply, manganese on rising Chinese port arrival costs — rather than showing a clear directional trend.

Ghana bauxite led today's international board at **78 USD/Ton CIF China**, with Guinea close behind at **69** — both reflecting the same supply-tightness narrative running through the aluminum complex. On the manganese side, Australian Lumpy Mn42% ore held the top of the range at **5.25 USD/DMTU**, while South Africa's lower-grade material continued to trade at a discount near **3.8–3.9**. Domestically, Durgapur and Raipur SiMn indices both firmed roughly 200 Rupee/Ton on pre-monsoon buying.

Note on dates — the source PDFs are dated 11 Jun 2026, over a month before this bulletin's send date. Worth confirming whether the report date should be read from the email header (current behavior) or parsed from the date printed inside the PDF, so a stale attachment can never silently pass as current.

Aluminum — Data

Global bauxite & aluminum market summary — CIF China basis

INTERNATIONAL BAUXITE PRICES

Ghana AL:47–51%; SI:1–2%		78 USD/Ton
Guinea AL:45%; SI:5%		69 USD/Ton
Australia AL:48–51%; SI:7–12%		61.5 USD/Ton
Malaysia AL:37–41%; SI:5–6%		51.5 USD/Ton

Bar length indexed to today's highest origin (Ghana, 78 USD/Ton). All four origins CIF China.

DOMESTIC ALLOY INDEX

ALUMINIUM ALLOY ADC12 — EAST CHINA
23,898–24,098CNY/Ton

■ Aluminum — Market Read

Condensed from today's FerroAlloyNet analyst commentary & news

🔗 CLAUDE-SYNTHESIZED, SOURCE-GROUNDED

Guinea bauxite-supply concerns and a red-mud-pond incident at a Shanxi alumina plant have lifted bullish sentiment, with sellers holding back stock and offers turning scarce. Alumina and electrolytic aluminum prices are both expected to trade in a narrow range near-term — cost-side support from tightening bauxite supply is offsetting soft downstream demand entering the traditional off-season.

SECTOR WATCH

- **Alcoa's valuation is back in focus** after UBS flagged aluminium supply risk and rising demand; the stock fell roughly 13.6% over the past week despite being up about 28% year-to-date.
- **The EU's 21st Russia sanctions package left alumina exports untouched** — Ireland is investigating whether Aughinish Alumina material is reaching Russian weapons supply chains.

■ Manganese — Data

International manganese ore market price by origin — CIF China basis

Australia (Lumpy) Mn42%		5.25 USD/DMTU
Brazil (Lumpy) Mn46–48% Fe3% P0.05% H2O:2–6%		5.15–5.2 USD/DMTU
Gabon (Lumpy) Mn44.5% Fe5% P0.11–0.14%		5.18 USD/DMTU
Brazil (Lumpy) Mn44–46% Fe6% P0.1% H2O:2–6%		5.1–5.15 USD/DMTU
Brazil (Lumpy) Mn42–44% Fe6% P0.1% H2O:2–6%		5.05–5.1 USD/DMTU
Gabon (Particle) Mn43% Fe5% P0.11–0.14%		4.98 USD/DMTU
Australia (Particle) Mn42%		4.9 USD/DMTU
South Africa (Lumpy) Mn36.5% Fe5%		4.8 USD/DMTU
South Africa (Lumpy) Mn32–34% Fe20%		3.85–3.9 USD/DMTU
South Africa (Lumpy) Mn28–30% Fe22%		3.8–3.85 USD/DMTU
Gabon (Particle) Mn41%		Not Reported

Bar length indexed to today's highest grade (Australia Lumpy Mn42%, 5.25 USD/DMTU). All CIF China basis; ranges shown as printed, bar sized to range midpoint.

DOMESTIC SIMN INDEX

DURGAPUR SIMN 6014#

74,700–75,200 Rupee/Ton

RAIPUR SIMN 6014#

74,500–75,000 Rupee/Ton

■ Manganese — Market Read

Condensed from today's FerroAlloyNet analyst commentary & news

🔗 **CLAUDE-SYNTHESIZED, SOURCE-GROUNDED**

Manganese ore prices held stable to slightly firm, with rising arrival costs at Chinese ports offsetting elevated inventories and softening high-iron grades; Australian ore ticked higher while South African grades held steady. Seaborne offers to India actually eased for July shipment (Gabon Mn44.5% down 0.3 USD/dmtu month-on-month) even as domestic Indian SiMn prices firmed on pre-monsoon buying — a divergence set against Chinese silicon-manganese producers still running at roughly –1.5% weekly margins.

SECTOR WATCH

- **India's state-owned MOIL cut manganese ore prices** effective 1 June 2026 — ferro grades above 44% Mn down 6%, grades below 44% down 5%.
- **Marula Mining is nearing first copper and manganese sales** across its African portfolio; Kenya manganese shipments to Baosteel are expected this month from stockpiled material assaying above 47% Mn.

Synthesized by Claude (Anthropic) from the "MANGANESE ORE ANALYSIS," "SILICON MANGANESE ANALYSIS," and "MANGANESE NEWS" sections of today's FerroAlloyNet Manganese Daily Report. No prices or facts beyond the source document were introduced.

■ Outlook & Regional Grid

Cross-market synthesis, consolidated domestic index, and methodology

MARKET TRAJECTORY CAPSULE

Both metals are trading in tight, cost-supported ranges rather than trending: aluminum on Guinea bauxite-supply risk, manganese on rising Chinese port arrival costs. Guinea supply headlines and Chinese coking-coal prices are the two swing factors most likely to break either market out of its current narrow band.

REGIONAL DOMESTIC MARKET INDEX

Durgapur SiMn Index <i>Silicon Manganese 6014#, Ex-works</i>	74,700–75,200 Rupee/Ton
Raipur SiMn Index <i>Silicon Manganese 6014#, Ex-works</i>	74,500–75,000 Rupee/Ton
Aluminium Alloy ADC12 East <i>China aluminum alloy ingot, East China</i>	23,898–24,098 CNY/Ton

METHODOLOGY

LIVE DATA	Pages 2 & 4 — extracted verbatim via structural pattern matching against the printed PDF tables. Nothing interpolated, estimated, or carried over from a previous day.
AI-SYNTHESIZED	Pages 3 & 5, and the trajectory capsule above — condensed by Claude from the source document's own analyst-commentary and news sections. Grounded in that text; not independently researched or fabricated.
NOT REPORTED	Gabon Particle Mn41% spot price was absent from today's source table and is shown as such, not estimated.
